

System Test & Customer Support Engineer

Company Overview

Polaris Motion is an advanced technology company founded in 1994. We have clients all over the world and our headquarters is in Victoria B.C. This is where we conduct our research, product development, marketing, sales, final test and assembly.

Our market areas are ultra-precision optics and ultra-fast laser manufacturing. We develop unique, advanced manufacturing technologies that put us ahead of our competition. It is due to the talented staff of engineers, scientists and computer scientists that we're able to beat out our competitors for success in many high-end machine design-ins.

Our company values include commitment, integrity, truth, and respect (**CITR**). We promote a culture that is innovative, creative, and competitive; one that fosters a climate of high team spirit, fun and accomplishment; and one that promotes personal growth and development. We strive to empower our employees to achieve their full potential.

We look forward to receiving your application. Please send your resume to careers@pmdi.com.

Job Summary

The job requires developing and implementing automated software tests for our motion control system. Our system includes electronic hardware and software and it needs to be thoroughly tested for a reliable customer experience. The job also requires the candidate to provide customer support and service. The job requires use of software tools and electronic test and measurement equipment.

Responsibilities

- Work with a cross functional team of software developers, engineers and scientists to design state-of-the-art products.
- Research new technologies and methods and suggest new ways to improve the company's products and processes.
- Support your developed works with documentation and communications to internal and external customers.
- Participate in peer review of designs; provide and receive critique in an effective manner.
- Manage multiple priorities and task simultaneously.
- Frequent travel to customer sites around the world.

Qualifications

- Post-Secondary Degree in Applied Science, Computer Science, Mechanical Engineering, or Physics

Duties

- Developing and implementing automated software regression tests
- Responding to customer questions and emails
- Setting up laser material processing systems and machines
- Install laser beam delivery systems, machine vision and optics
- Configure and tune CNC machines
- Run CNC machines and make customer parts

Skills & Abilities

- Software Testing Techniques
- C, C++, C# Programming
- Microsoft and Linux Operating Systems
- Version Control Systems
- Electronics Test & Measurement Systems
- Excellent Verbal and Written Communication Skills
- Holder of a Driver's License
